Management will continuously evaluate the Company's ability to continue as a going concern and will take appropriate action and will make appropriate disclosures if there is any change in any condition or events that would raise substantial doubt about the Company's ability to continue as a going concern.

20. Fair value measurements

A. and B.

The Company had no material assets or liabilities measured and reported at fair value at June 30, 2017.

C. Certain of the Company's financial instruments are measured at fair value in the financial statements. The fair values of these instruments are based on valuations that include inputs that can be classified within one of three levels of a hierarchy established by U.S. generally accepted accounting principles. The following are the levels of the hierarchy and a brief description of the type of valuation information ("inputs") that qualifies a financial asset or liability for each level:

- **Level 1** – Unadjusted quoted prices for identical assets or liabilities in active markets.
- **Level 2** – Inputs other than Level 1 that are based on observable market data. These include: quoted prices for similar assets in active markets, quoted prices for identical assets in inactive markets, inputs that are observable that are not prices (such as interest rates and credit risks) and inputs that are derived from or corroborated by observable markets.
- **Level 3** – Developed from unobservable data, reflecting our own assumptions.

Financial assets and liabilities are classified based upon the lowest level of input that is significant to the valuation. When quoted prices in active markets for identical assets and liabilities are available, we use these quoted market prices to determine the fair value of financial assets and liabilities and classify these assets and

STATEMENT AS OF JUNE 30, 2017 OF THE Coventry Health Care of Missouri, Inc.

liabilities as Level 1. In other cases where a quoted market price for identical assets and liabilities in an active market is either not available or not observable, we estimate fair value using valuation methodologies based on available and observable market information or by using a matrix pricing model. These financial assets and liabilities would then be classified as Level 2. If quoted market prices are not available, we determine fair value using broker quotes or an internal analysis of each investment's financial performance and cash flow projections. Thus, financial assets and liabilities may be classified in Level 3 even though there may be some significant inputs that may be observable.

The carrying values and estimated fair values of the Company's financial instruments at June 30, 2017 were as follows:

Type of Financial Instrument	Aggregate Fair Value	Admitted Assets	(Level 1)	(Level 2)	(Level 3)	Not Practicable (Carrying Value)
Bonds, short-term investments and cash equivalents ..	245,301,422	238,405,895	13,105,035	232,196,387	0	

There were no material realized and unrealized capital gains, purchases, sales, settlements, or transfers into or out of the Company's Level 3 financial assets at June 30, 2017. There were no transfers between the Company's Level 1 or 2 financial assets during June 30, 2017.

In evaluating the Company's management of interest rate and liquidity risk and currency exposures, the fair values of all assets and liabilities should be taken into consideration, not only those presented above.

- (4) There were no Risk Corridor asset and liability balances to report by program benefit year at June 30, 2017.
- (5) There were no ACA Risk Corridors Receivable balances to report as of June 30, 2017.

25. Change in incurred claims and claims adjustment expense

In June 30, 2017, reserves for incurred claims and claim adjustment expenses attributable to insured events of prior years decreased by \$15,485,367 from \$70,630,769 in 2016 to \$55,145,402 in 2017. In 2016, reserves for incurred claims and claim adjustment expenses attributable to insured events of prior years' increased by \$803,266 from \$60,244,438 in 2015 to \$61,047,704 in 2016. The lower than anticipated health care cost trend rates observed in 2017 and 2016 for claims incurred in 2016 and 2015, respectively, were due to moderating outpatient and physician trends and faster than expected claim payment speed. The Company considers historical trend rates together with knowledge of recent events that may impact current trends when developing estimates of current trend rates. Original estimates are increased or decreased as additional information becomes known regarding individual claims. Historical health care cost trend rates are not necessarily representative of current trends. The Company excluded the impact of the change in health care receivables related to pharmacy rebates from the above roll-forward to conform to NAIC Annual Statement presentation.

The methodology used in calculating the liability has been consistently applied between years. As of June 30, 2017 and December 31, 2016, accrued claim adjustment expenses were \$724,518 and \$897,791, respectively. The reserve is determined as a percentage of claims reserves. The Company periodically reassesses the percentage applied based on historical experience.
